Ann Arbor, MI 48103

Serving and loving the Washtenaw County Community since 2018

For many, treatment is a long-term, if not lifelong process that involves multiple interventions and regular monitoring. We offer our patients the opportunity to do start the oral medications from the privacy of their own home.

Like the rest of our Direct Primary Care practice, we've worked hard to make this affordable to our patients. Addiction treatment requires far more meetings and testing resources when done properly so we offer this as a separate, additional service.

Medication Assisted Treatment (MAT)

- ✓ Buprenorphine products (brand name: Suboxone®, Zubsolv®) for opioid dependence
- ✓ The Sinclair Method (The 3 Cs) with Naltrexone for alcohol cravings or dependence
- ✓ Vivitrol® monthly injections for opioid or alcohol dependence
- ✓ Sublocade® monthly injections for opioid dependence
- ✓ Acamprosate for alcohol cravings or dependence
- ✓ A community-based approach with emphasis on individual therapy, group support therapy, and peer recovery coaches
